DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the feature of "the body of dielectric material" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

2. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

Art Unit: 1741

3. The specification is objected because the headings introducing various paragraphs of the specification have been omitted.

The following guidelines illustrate the preferred layout and content for patent applications. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

The following order or arrangement is preferred in framing the specification and, except for the reference to the drawings, each of the lettered items should appear in upper case, without underling or bold type, as section headings. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) Title of the Invention.
- (b) Cross-Reference to Related Applications.
- © Statement Regarding Federally Sponsored Research or Development.
- (d) Reference to a "Sequence Listing," a table, or a computer program listing appendix submitted on compact disc (see 37 CFR 1.52(e)(5)).
- (e) Background of the Invention.
 - 1. Field of the Invention.
 - 2. Description of the Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) Brief Summary of the Invention.
- (g) Brief Description of the Several Views of the Drawing(s).
- (h) Detailed Description of the Invention.
- (I) Claim or Claims (commencing on a separate sheet).
- (j) Abstract of the Disclosure (commencing on a separate sheet).
- (k) Drawings.
- (l) Sequence Listing, if on paper (see 37 CFR 1.821-1.825).

Art Unit: 1741

4. The disclosure is objected to because of the following informalities:
 - o in page 7, the phrase "PCT/GB00/3943 . respectively." with incorrect punctuation; and
 - o in page 11, the "figure 1" is not starting with capital F.

Appropriate correction is required.

5. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1741

7. Claims 28, 29, 33, 34, 42, 44 and 47 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 28, the phrase "the separation", "the plasma volume", "the lengths" and "the plasma volume space" lack antecedent basis. The phrase "this shape and the gas passage ... providing ... electric field" is indefinite as the phrase references to a method of operating the reactor.

Regarding claim 29, the phrase "a body of dielectric material" is confusing as whether it is the same body recited in claim 28 or another. And the same is applied to the phrase "a plurality of gas passages".

Regarding claim 33, the phrase "the exhausts" lacks antecedent basis.

Regarding claim 34, the phrase "these phases" is lacking antecedent basis. The phrases "including ..." (nine occurrences) being confusing when claiming together with the Markush group and the phrase "in particular" are both indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required

Art Unit: 1741

feature of the claims. The phrase "known as ZSM-5" is indefinite because of the trademark name.

Regarding claim 42, the phrase "the voltage" lacks antecedent basis.

Regarding claim 44, the Markush group is improperly recited. It should be in the form "a ... selected from the group consisting of ...".

Regarding claim 47, the phrase "the plasma region" lacks antecedent basis.

Allowable Subject Matter

8. Claims 28-47 would be allowable if rewritten or amended to overcome the rejection(s) to claims under 35 U.S.C. 112, second paragraph, set forth in this Office action.

9. The following is a statement of reasons for the indication of allowable subject matter: Because the prior art references do not disclose in a reactor for the plasma assisted processing of a gaseous medium the recited structures of a plurality of gas

Art Unit: 1741

passages and that the gas passages are shaped to have a pair of opposed sides the contour of which matches the contour of the facing surfaces of the electrodes in combination with other recited structures as claimed in claims 28-47.
